National Extension Advisory Group (NEAG)

OPERATIONAL MODEL

Key Regional Program Areas

Key Issues	Biosecurity	Pests and Diseases	Water Management	Production Systems	Soils & Nutrient Management	Markets	Business Capacity, Costs & Labour	Waste Management	Precision Ag
NT	Biosecurity	IPM	Water efficiency	Protected Cropping	Soil health				
North QLD	Biosecurity	Chemical resistance			Impact on reef		Input costs	Ag Plastics	
Wide Bay Burnett QLD	Biosecurity		Water and irrigation			Value adding waste / 2nds		Inorganic waste	
Southeast QLD		Pest management					Labour, Regional Capacity Building, New Entrants, CALD		
NSW	Biosecurity	Pests and diseases	Water and irrigation	Advanced Production Systems	Sustainable Crop Management	Export preparation			Precision Ag
Gippsland VIC	Biosecurity	IPM	Environment - water management				Business Capacity & Sustainable Workforce		Precision Ag
VIC		Pests and diseases	Water		Soils & nutrient management		Profit on farm		Precision Ag
TAS	Biosecurity	Crop protection		Climate risk	Soil management		Workforce / staff succession	Recycling and reuse	Precision Ag
SA					Salinity	New Markets & Value Adding	Business Capability & Efficiency		
WA	Biosecurity	Pests and diseases	Water and crop nutrition			Markets	Business management
