

Australian Government
**Australian Pesticides and
Veterinary Medicines Authority**

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL
PRODUCT FOR CONTROL OF APHIDS IN RHUBARB**

PERMIT NUMBER – PER14212

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 31 OCTOBER 2013 TO 31 OCTOBER 2025

Permit Holder:

HORTICULTURE INNOVATION AUSTRALIA LTD
Level 7, 141 Walker Street
NORTH SYDNEY NSW 2060

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Products to be used:

CONFIDOR 200 SC INSECTICIDE (APVMA No. 50548)

PLUS OTHER REGISTERED PRODUCTS

Containing: 200 g/L IMIDACLOPRID as the only active constituent.

KOHINOR 350 INSECTICIDE (APVMA No. 69375)

PLUS OTHER REGISTERED PRODUCTS

Containing: 350 g/L IMIDACLOPRID as the only active constituent.

Directions for Use:

Crop	Pest	Rate
Rhubarb	Aphids	<u>200 g/L products</u> 25 mL/100 L OR 300 mL/ha <u>350 g/L products</u> 15 mL/100 L OR 175 mL/ha

Critical Use Comments:

- Apply at the first sign of aphid infestation.
- DO NOT use more than 2 applications per year with at least 6 weeks between applications.
- Apply by foliar application using boom spray or equivalent suitable to achieve good crop coverage. Use spray volume sufficient to provide adequate penetration and coverage.
- DO NOT apply imidacloprid in consecutive sprays.
- Dangerous to bees. DO NOT spray any plants in flower if bees may forage on treated flowers.
- Imidacloprid is toxic to certain aquatic species. DO NOT contaminate streams, rivers or waterways with the chemical used containers.

Withholding Period:

Harvest: Do not harvest for 14 days after application.

Jurisdiction:

All States and Territories, except VIC.

Note: Victoria is not included in this permit, as their Control-of-Use legislation means a permit is not required to legalise this off-label use in that State.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

To Avoid Crop Damage

The sensitivity of the crop to be treated under this permit has not been fully evaluated. It is advisable to only treat a small area to ascertain the reaction before treating the whole crop.

Other Matters

Continued issuance of this permit is subject to the outcomes of the current APVMA review of neonicotinoids. This permit may be impacted by the outcomes of this review.

The holder of the permit must notify the APVMA of new information, including relevant information in accordance with section 161 of the Schedule to the *Agricultural and Veterinary Chemicals Code Act 1994*, in accordance with the obligation imposed by that section.

Issued by the Australian Pesticides and Veterinary Medicines Authority

Note: Permit amended to include registered products containing 350 g/L imidacloprid and to extend expiry date until 31 December 2022. Permit version 2 issued 11 December 2017.

06/10/2022 – Bee and aquatic life protection added to Critical Use Comments. Additional Conditions updated to current standard. Chemical Review and s161 statements added. Permit expiry extended to 31/10/2025. Permit issued as Version 3.
