

CUCUMBER GREEN MOTTLE MOSAIC VIRUS

WORKSHOP

National Vegetable
Extension Network

SOUTH AUSTRALIA

Cucumber green mottle mosaic virus (CGMMV) is a plant disease which is exotic to Australia. CGMMV occurs in Europe, Asia, the Middle East, some parts of the USA, and Canada.

THE VIRUS INFECTS:

- watermelon
- cucumber
- melons
- zucchini
- pumpkin
- squash
- bitter melon
- bottle gourd

Come along to the workshop to learn and understand more about the Virus and how it could affect your business, through speakers Christina Cook from Biosecurity SA and Dr Jessica Lye from AUSVEG.

A copy of the CGMMV Management Plan will be provided and discussed during the session

AGENDA
