

**PERMIT TO ALLOW MINOR USE OF AN AGVET CHEMICAL PRODUCT
FOR THE CONTROL OF FUNGAL DISEASES IN SILVERBEET, SPINACH,
CHICORY, ENDIVE, PARSLEY AND CORIANDER**

PERMIT NUMBER –PER82745

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 23 AUGUST 2017 TO 31 AUGUST 2020.

Permit Holder:

HORTICULTURE INNOVATION AUST LTD,
LEVEL 8, 1 CHIFLEY SQUARE
SYDNEY, NSW, 2000

Persons who can use the product under this permit:

Persons generally

CONDITIONS OF USE

Product to be used:

SCORE FOLIAR FUNGICIDE

PLUS OTHER REGISTERED PRODUCTS

Containing: 250 g/L DIFENOCONAZOLE as their only active constituent.

Directions for Use:

Crop	Pest	Rate
Silverbeet, spinach, chicory, endive (field crops only)	Powdery mildew	50 mL/100 L when spray volume exceeds 800 L/ha or 500 mL/ha when spray volume is less than 800 L.
Parsley and coriander (field crops only)	Leaf blight (<i>Cercospora</i> spp.)	300 ml/ha

Critical Use Comments:

Silverbeet, spinach, chicory, endive

- Apply at first sign of disease.
- Apply as a foliar application via boom spray or equivalent.
- DO NOT apply more than 2 applications of difenanconazole per crop with a minimum re-treatment interval of 10 days.
- DO NOT apply in volumes less than 500 L/ha.

Parsley and coriander

- Use in a protectant program before diseases occur.
- Apply at 7 day intervals when conditions favour disease development.
- DO NOT apply more than two consecutive sprays of difenoconazole alone (then apply a recommended non-group C fungicide or tank-mix difenaconazole with a recommended protectant fungicide for at least one application).
- DO NOT apply more than 3 applications of difenanconazole per crop.

Withholding Period:

Harvest: DO NOT harvest for 7 DAYS after application.

Grazing: DO NOT graze or cut for stock food.

Jurisdiction:

ALL States except Vic.

(Note: Victoria is not included in this permit because their 'control-of-use' legislation means that a permit is not required to legalise this off-label use in Victoria).

To Avoid Crop Damage

The sensitivity of some varieties to be treated under this permit has not been fully evaluated under all growing conditions. It is advisable, therefore, to only treat a small area of crop to ascertain their reaction before treating a larger areas.

Additional Conditions:

This Permit provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit.

RESIDUES:

To allow produce from treated plants or animals to be supplied or otherwise made available for human or animal consumption the APVMA has established the following temporary maximum residue limit (TMRL): Difenaconazole HH0740 Parsley and Coriander T20 mg/kg, VL0502 Spinach, VL0464 Chard (silverbeet), VL0469 Chicory leaves (green and red cultivars) and VL0476 Endive T3 mg/kg.

Export of Produce:

Exported produce or animals must have appropriate residue tolerance limits established in the importing countries and any residues must not exceed the tolerance limits.

Issued by the Australian Pesticides and Veterinary Medicines Authority
