

PERMIT TO ALLOW MINOR USE OF AN AGVET CHEMICAL PRODUCT

FOR THE CONTROL OF VARIOUS FUNGI IN CERTAIN CROPS

PERMIT NUMBER – PER84426

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 18 NOVEMBER 2014 TO 31 MARCH 2019.

Permit Holder:

HORTICULTURE INNOVATION AUSTRALIA
Level 8, 1 Chifley Square
SYDNEY NSW 2000

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Product to be used:

ROVRAL LIQUID FUNGICIDE

Containing: 250 g/L IPRADIONE as their only active constituent.

CAMPBELL IPPON 500 AQUAFLO FUNGICIDE

PLUS OTHER REGISTERED PRODUCTS

Containing: 500 g/L IPRADIONE as their only active constituent.

Directions for Use:

Crop	Disease	Rate
Green Beans	Sclerotinia (<i>Sclerotinia spp.</i>)	250 g/L product: 2L/ha or 200mL/100L
Carrots	Black Rot (suppression only) (<i>Alternaria radicina</i>)	
Spinach and Silverbeet	Sclerotinia (<i>Sclerotinia spp.</i>) and Grey Mould (<i>Botrytis spp.</i>)	500 g/L product: 1L/ha or 100mL/100L

Critical Use Comments:

Green Beans, Spinach and Silverbeet:

Apply in sufficient water to ensure complete and thorough coverage of foliage and / or crop.

Apply a maximum of 4 foliar applications per crop using a boom spray.

Repeat after 7-10 days if necessary. Apply when conditions favour disease development.

Follow a complete disease management program for Botrytis by rotating with fungicides from unrelated chemical groups as per the CropLife fungicide resistance management guidelines.

Carrots:

Apply in sufficient water to ensure complete and thorough coverage of foliage and / or crop using a boom spray. For conventional varieties that have a growing cycle of 12-25 weeks -

Apply a maximum of 2 applications per crop. The first application when the crop is 6-8 weeks old and the following application one week later. Minimum retreatment interval between consecutive applications is 7-10 days, if necessary.

For bunching varieties that have a growing cycle of 7 - 11 weeks - Apply once when the crop is 4 weeks old.

Withholding Period:

Harvest:

Green Beans, Spinach and Silverbeet: DO NOT harvest for 7 days after last application

Carrots (All varieties): Not required when used as directed.

Grazing: DO NOT allow livestock to graze treated crops or stubble that have been treated with iprodione.

Jurisdiction:

ALL States

Additional Conditions:

THIS PERMIT provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

PERSONS who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit.

TO AVOID CROP DAMAGE:

The sensitivity of some species and varieties of the crops to be treated under this permit has not been fully evaluated. It is advisable, therefore, to only treat a small number of plants to ascertain their reaction before treating the whole crop.

Export of produce:

To allow treated produce to be supplied or otherwise made available for human consumption Temporary Maximum Residue Limits (TMRL) have been established for Iprodione covering the commodities Carrot at 0.5mg/kg, Beans, except broad bean and soya bean at 2mg/kg and Chard [Silver beet] at 15mg/kg. This MRL applies only to produce marketed and consumed in Australia. If treated produce is to be exported, due account should therefore be taken of the residue definition and residue limits/import tolerances of importing countries and that any residues must not exceed those requirements of the importing country.

Issued by

Australian Pesticides and Veterinary Medicines Authority

Note: This permit is issued 22 September 2017 as a renewal of previous permit PER12567. The permit is now issued under a different number as the permit holder has changed.
