

**PERMIT TO ALLOW MINOR USE OF AN AGVET CHEMICAL PRODUCT
FOR CONTROL OF BOTRYTIS AND SCLEROTINIA ROTS IN CAPSICUM**

PERMIT NUMBER – PER84878

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 28 MAY 2012 TO 30 NOVEMBER 2022.

Permit Holder:

HORTICULTURE INNOVATION AUSTRALIA LTD
Level 8, 1 Chifley Square
SYDNEY NSW 2000

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Products to be used:

SWITCH FUNGICIDE

PLUS OTHER REGISTERED PRODUCTS

Containing: 375 g /kg CYPRODINIL and 250 g /kg FLUDIOXONIL as its only active constituents.

Directions for Use:

Crops	Diseases	Rate	Critical Use Comments:
CAPSICUM	BOTRYTIS ROT (<i>Botrytis cinerea</i>) & SCLEROTINIA ROT (<i>S.minor</i> or <i>S. sclerotiorum</i>)	Apply 100 g/100L OR 1 kg/ha	DO NOT apply more than two (2) applications per crop. Follow a complete disease management program for Botrytis and Sclerotinia rots by rotating with fungicides from unrelated chemical groups as per the <i>CropLife Fungicide Resistance Management Guidelines</i> .

Withholding Periods:

DO NOT HARVEST FOR 7 DAYS AFTER APPLICATION.

Jurisdiction:

ALL STATES, except VIC.

Note: Victoria is not included in this permit, as their *Control-of-Use* legislation means a permit is not required to legalise this off-label use in that state.

Additional Conditions:

This PERMIT provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this PERMIT, the use of the product must be in accordance with instructions on its label.

PERSONS who wish to prepare for use and/or use the products for the purposes specified in this permit must read, or have read to them, the PERMIT, particularly the information included in DETAILS and CONDITIONS.

Export of Produce:

To allow treated produce to be supplied or otherwise made available for human consumption the APVMA has established Maximum Residue Limits (MRLs) for:

- Fludioxonil at 0.7 mg/kg in sweet peppers (capsicum), and
- Cyprodinil at 2 mg/kg in sweet peppers (capsicum).

These limits apply only to produce marketed and consumed in Australia. Therefore if treated produce is to be exported due account should be taken of the residue definition and residue limits/import tolerances of importing countries and that any residues must not exceed those requirements of the importing country.

Issued by

Australian Pesticides and Veterinary Medicines Authority

Note: This a renewal of PER11564, with the holder now being Horticulture Innovation Australia. Permit amended to extend expiry date until 30 November 2022. Permit version 1 issued 28 August 2017.
