

PROGRAM SAFETY READY

Welcome to the Safety Ready Program

Delivered by Safe Ag Systems™ Pty Ltd

Program outcome - Over the 30 days (or less if you like) you will have improved your understanding of your safety risks and obligations. However the best part is that you will have now taken steps towards compliance by implementing a safe system of work.

How Safety Ready are you?

Module 1 Approx 10min

Complete a simple online self-assessment (13 questions requiring a yes or no response) to measure your awareness and compliance readiness in managing a safe system of work. Remember to include your email address and check the box at the end "send me a copy of my responses" – you will refer to this copy in Module 5.

Understanding your safety risks and obligations

Module 2 - Approx 30min

At your own pace review short videos and other material to become much more aware of your safety risks and obligations.

Implementing a safe system of work - Part 1

Module 3 - Approx 60min

You are now ready for an extended free trial of Safe Ag Systems. This module will introduce you to the software.

You will be guided through setup and how to customise it for your business. On completion of this module you will have adopted a set of policies, created an emergency response plan and have the beginnings of a health and training register.

Implementing a safe system of work - Part 2

Module 4 - Approx 60min

With a focus on machinery, inductions and performing farm inspections. This module will give you the confidence to pull together a complete safety management plan.

Feeling Safety Ready now?

Module 5 - Approx 10 min

Re-do the online self-assessment and see how your knowledge and compliance readiness has improved.

Course Info

Cost: Free

Duration: Self paced over 30 days

"I didn't realise what we had to do on our farm. After competing this short course we not only had a better understanding but were on our way to having a robust safety system." Loxton, SA
