

# CSIRO 'extrusion' demo and leafminer workshop

Creating value from vegetable waste and managing vegetable leafminer

National Vegetable  
**Extension Network**

VICTORIA - NORTHERN,  
WESTERN & SOUTH EASTERN

**Interested in how to turn vegetable waste into nutrient dense, value added products, or how to protect against the vegetable leafminer?**

Watch an extrusion demonstration of broccoli and carrot by the CSIRO as well as participate in a 'mock surveillance' exercise to prepare for the arrival of the vegetable leafminer.

- **Dr Jessica Lye, AUSVEG:** the session will focus on what the leafminer is, where it is found, the damage it causes and how to protect against it.
- **Dr Danyang Ying, CSIRO:** the live demonstration will allow participants to see, touch and taste the extruded broccoli or carrots, and discuss opportunities for value added products within your business.
