

Precision Ag & Integrated Crop Protection Farm Walk

National Vegetable Extension Network

VICTORIA - NORTHERN,
WESTERN & SOUTH EASTERN

Interested in how to turn data into results through the use of precision agriculture technology?

Join this farm walk at Fresh Select in Werribee South to learn about how two Hort Innovation levy-funded projects can be used to help make more informed decisions on farm.

Hear from the project teams of the **Adoption of precision systems technology in vegetable production (VG16009)** project and the **Soil Wealth and Integrated Crop Protection - phase 2 (VG16078)** project, as well as the team from Fresh Select about how precision agriculture mapping and crop sensing is being used for problem area identification and variable input response.

Topics to be discussed include:

- Drones for plant counts and crop sensing
- EM38 mapping
- Variable rate gypsum application to manage saline-sodic soils
- Compost applications for improving soil health

Details

- Date:** Monday, 25 November 2019
- Time:** 2.00 pm - 3.00 pm
- Location:** Fresh Select, 610 Duncans Rd,
Werribee South VIC
- RSVP:** CJ Wilkens
0416 544 362
