**PERMIT NUMBER – PER91292**

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

**THIS PERMIT IS IN FORCE FROM 27 JULY 2021 TO 31 JULY 2022**

**Permit Holder:**

HORTICULTURE INNOVATION AUSTRALIA LTD  
Level 7, 141 Walker Street  
NORTH SYDNEY NSW 2060

**Persons who can use the product under this permit:**

Persons generally.

## CONDITIONS OF USE

### Products to be used:

LUNA SENSATION FUNGICIDE (APVMA No. 65560)

Containing: 250 g/L FLUOPYRAM and 250 g/L TRIFLOXYSTROBIN as the only active constituents.

### RESTRAINT:

For PROFESSIONAL use only.

DO NOT apply by aircraft.

DO NOT apply if heavy rains or storms are forecast within 3 days.

DO NOT irrigate to the point of water runoff from the treatment area for at least 3 days after application.

Follow all spray drift restraints on the product label.

### Directions for Use:

Crop	Disease	Rate
Green beans ( <i>Phaseolus vulgaris</i> ) Field grown	Powdery mildew ( <i>Podosphaera xanthii</i> & <i>Erysiphe pisi</i> )	800 mL/ha

### Critical Use Comments:

- Apply prior to disease onset as part of a preventative program.
- Apply as a foliar spray by ground based boomspray.
- Use a spray volume of 300-500 L/ha. Ensure thorough coverage of all foliage.
- Apply a maximum of 2 applications in the same paddock per year, with a 7-14 day re-treatment interval.
- Luna Sensation should be applied as part of an integrated disease control program that incorporates other measures such as crop rotation, planting resistant crop varieties and moisture management to reduce humidity and crop wetness in order to limit disease pressure.

### Withholding Period:

Harvest: Do not harvest for 21 days after application.

Grazing: Do not graze or cut for stock food for 21 days after application.

### Plant back interval requirements for rotational crops

The following plant back intervals are required for rotational crops:

Crop group	Plant back interval
Vegetables	None
Cereals, pulses, oil seed crops and pastures	7 months

### Jurisdiction:

Qld only.

### Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

### Export of treated produce -

Temporary Maximum Residue Limits (TMRLs) have been established to allow treated produce to be used for human and/or animal consumption. MRLs can be found in the *Agricultural and Veterinary Chemicals Code (MRL Standard) Instrument 2019*. MRLs apply only to produce marketed and consumed in Australia. If treated produce is to be exported, residues must not exceed the limits/tolerances of the importing country.
