

**PERMIT TO ALLOW MINOR USE OF AN AGVET CHEMICAL PRODUCT
FOR CONTROL OF TWO-SPOTTED MITE ON LETTUCE GROWN IN
PROTECTED SITUATIONS**

PERMIT NUMBER - PER14210

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 17 OCTOBER 2013 TO 31 OCTOBER 2026.

Permit Holder:

HORTICULTURE INNOVATION AUSTRALIA LTD
Level 8, 1 Chifley Square
SYDNEY NSW 2000

Persons who can use the product under this permit:

Persons generally

CONDITIONS OF USE

Product to be used:

ACRAMITE MITICIDE (APVMA No. 55264)

PLUS OTHER REGISTERED PRODUCTS

Containing: 480 g/L BIFENAZATE as the only active constituent.

MAFENTE XTRA MITICIDE (APVMA No. 85120)

PLUS OTHER REGISTERED PRODUCTS

Containing: 500 g/kg BIFENAZATE as the only active constituent.

Directions for Use:

Crop	Insect Pest	Rate
Lettuce (Head, Cos, and Leafy varieties)	Two-spotted Mite (<i>Tetranychus urticae</i>)	480g/L product: 65 mL / 100 L
Grown in protected situations only.		500g/kg product 63 g / 100L

Critical Use Comments:

- Use in protected situations (e.g. hydroponic and greenhouse systems) for head, Cos and leafy lettuce varieties.
- DO NOT apply more than one (1) applications per crop.
- Apply to the point of runoff as soon as mites appear. Complete coverage of lettuce leaves is essential to obtain effective mite control.
- To avoid resistance development where more frequent control of two-spotted mite is required, it is strongly recommended that approved products be alternated from different chemical groups.

Withholding Period:

Harvest – DO NOT harvest for 15 DAYS after application.

Jurisdiction:

QLD, SA and WA only.

Note: Victoria is not included in this permit, as their Control-of-Use legislation means a permit is not required to legalise this off-label use in that state.

Additional Conditions:

This permit provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit.

To Avoid Crop Damage:

The sensitivity of some lettuce cultivars/varieties to be treated under this permit have not been fully evaluated under all growing conditions. It is advisable to only treat a small number of plants and closely monitor plant health. Discontinue applications when any adverse symptoms post-treatment are observed.

Export of treated produce

Temporary Maximum Residue Limits (TMRLs) have been established to allow treated produce to be used for human consumption. An MRL has been established for bifenazate in lettuce, head, lettuce, leaf and Cos Lettuce. MRLs can be found in the *Agricultural and Veterinary Chemicals Code (MRL Standard) Instrument 2019*. MRLs apply only to produce marketed and consumed in Australia. If treated produce is to be exported, residues must not exceed the limits/tolerances of the importing country.

Issued by Australian Pesticides and Veterinary Medicines Authority

Note: 30 April 2018 - Permit amended to update permit holder details, permit issued as Version 2.

29 August 2018 - Permit amended to extend expiry date to 30 September 2021. Permit issued as Version 3.

12 July 2021 – Permit expiry extended to 30/04/2022. Permit issued as Version 4.

25 October 2021 – Permit updated to add cos lettuce to the hosts, to add the 500 g/kg product range, and to update the conditions. Permit expiry extended to 31/10/2026. Permit issued as Version 4.
