

Soil Moisture Monitoring in vegetable crops

Field Day: Growing Gippsland's Drought Resilience with technology & better soil

Join VegNET Gippsland for presentations and a field walk. Hear from technology expert, Marek Matuszek, host grower Walter Chadwick & Project Reference Group members.

- Adopting soil moisture monitoring and getting the best out of it for your water use and soils -
 - What sensor to choose
 - What to expect in the first season
 - How can data add value to your production
- Agriculture Victoria and WGCMA's Sustainable Irrigation Program, and
- Other irrigation support services available to the vegetable industry

A light lunch & refreshments will be provided

Friday 6 May, 12:30 - 3:00pm

Boisdale Recreation Reserve

Please contact Bonnie to RSVP by 4 May
