

Building biosecurity capacity and resilience in the NSW vegetable industry

Effective pest and disease management on your farm.

What are the best ways to actively prevent, manage and monitor?

Local advisers and growers presenting & discussing:

- Pest and disease identification, integrated management options & monitoring in current and forecasted seasonal conditions.
- Easy to achieve proactive on-farm biosecurity checks, actions & monitoring.
- Getting targeted results from your spraying program & equipment while caring for beneficial predators!
- Pest & disease sampling for diagnostics testing- what is it and how do you do it?

Take home a diagnostics kit to submit pest & disease samples to the NSW DPI laboratory for FREE!

Please make sure you register!

Register by Monday 29 April please!

This is an event of the *Building Biosecurity Capacity and Resilience within the NSW Vegetable Industry Project*, funded by the Australian and NSW Government's Storm and Flood Industry Recovery Program with support from AUSVEG, and the *Clean Coastal Catchments project* of North Coast Local Land Services, part of the NSW Government funded Marine Estate Strategy. The ten-year Strategy was developed by the NSW Marine Estate Management Authority to coordinate the management of the marine estate.
